

ANNUAL REPORT *2022-23*

About the School

The Balsillie School of International Affairs (BSIA) is an institute for advanced research, education, and outreach in the fields of global governance and international public policy.

As a hub in a global network of scholars, practitioners and students, the BSIA aims to develop new solutions to humanity's critical problems, improve global governance now and in the future, and enhance the quality of people's lives around the world.

Founded in 2007 by philanthropist Jim Balsillie, the BSIA is an equal collaboration among the Centre for International Governance Innovation (CIGI), the University of Waterloo (UW), and Wilfrid Laurier University (Laurier). The collaborating institutions bring to the BSIA different but complementary strengths, so they have different roles and responsibilities.

The two universities employ BSIA faculty and offer BSIA's academic programs, while CIGI, as a think tank, uses its in-house expertise and its worldwide network of practitioners to help inform and guide BSIA's outreach and collaborative research. The BSIA is also the home to four research centres with an international profile - the International Migration Research Centre; the Laurier Centre for Sustainable Food Systems; the Canadian Network for Research on Terrorism, Security and Society; and the Hungry Cities Partnership.

The unique integration of the collaborating institutions' approaches and cultures gives BSIA an unmatched ability to promote vigorous engagement across boundaries of discipline and practice, to connect today's experts with tomorrow's leaders in critical debate and analysis, and to achieve—in all its work—the highest standards of excellence.

Highlights of the Year

The academic year of 2022-2023 marked the return of in-person classes, events and the presence of more faculty, fellows and students in the corridors and offices. The new levels of welcomed movement and noises in our corridors revitalized a much-cherished element of 'community' at the School, which remains a cornerstone of all the BSIA does. The in-person presence also enabled an important period of reflection for the School, and an opportunity to evaluate our progress and strategic direction in light of the profound global changes, which the new international terrain brought. This

reflection led the BSIA to pursue a broader range of opportunities to support our community, strengthen our international projection and innovate areas of our delivery. Thanks to the collective efforts of the entire BSIA community, the School's development of new, exciting pathways was made possible.

In September 2022, we were once again delighted to welcome a large cohort of MIPP, MAGG and PhD students. Mr. Jim Balsillie, the School's founder and donor, presided as keynote speaker at the students' in-person orientation day, setting a positive tone for the year ahead.

The fall marked the mid-term point of our five-year strategic plan. Following wide consultation across our institutional partners, the team produced an evolved strategic plan which built on existing strengths and capitalized on opportunities which the School was well-positioned to pursue. This evolved strategic direction prioritized the value proposition to both our students and institutional partners, an internationalized and innovated BSIA student experience, and the attraction and retention of leading experts. Building on the technology thought leadership of the broader Waterloo region, the School also incorporated a distinct theme of technology governance.

Against this backdrop, the School launched its inaugural "Technology Governance Summer School" program in August 2023. This program was made available to all current and incoming BSIA students, with places also offered to other UW and Laurier faculties. The course helped provide students with critical technology-related knowledge and skills to enter a data-driven and digitalized policy world.

We were delighted with the enthusiastic engagement at our first ever BSIA Alumni Reunion, which was held in Ottawa in May 2023. The event was a wonderful opportunity to provide updates to alumni on the School's programs, initiatives and strategic direction. Participating faculty, staff and alumni all benefited from the valuable networking opportunity. We look forward to our second alumni event, which will be held in Toronto in May 2024.

Continuing with our commitment to promote equity, diversity and inclusion in all that we do, our strategic plan also highlighted the important contribution of the arts community to the field of international affairs. The School cultivated relationships across wider university faculties, such as English and Film Studies, and launched a "Migration Storytelling" series, which showcases diverse perspectives through storytelling in the context of films, fine art and literature. Our inaugural event featured Kitchener's own Angela Onuora, who premiered her award-winning film, "Operation Lights Out", to a full CIGI auditorium.

Throughout the year, the BSIA participated in key international events, including the Association of Professional Schools of International Affairs' (APSIA) Annual General Meeting of Deans and Directors, held at Sciences Po, in Paris. The BSIA Director also represented the School at the "Canada in Asia Conference" in Singapore, which attracted university presidents, and public sector and industry leaders from across Canada and Southeast Asian. The BSIA

collaborated with both CIGI and the Royal United Services Institute – a UK-based leading global think-tank – for an event which attracted senior UK policy and research leaders.

Projecting internationally continued both at home and abroad. In September 2022, the School collaborated with the Global Arena Research Initiative (GARI) to host an international symposium which attracted academics and industry leaders from both sides of the Atlantic. In January 2023, we also welcomed Dr. John Hancock, Strategic Adviser to the President at the World Trade Organization, as the distinguished 2023 Balsillie Lecturer.

The year also marked a gradual expansion in the delivery of the Balsillie Executive Institute's short course program. Courses on national security were added to the roster and enjoyed good take-up from Government of Canada departments. A team of BSIA faculty members collaborated with the United Nation's Institute for Training and Research to deliver a short course entitled "UN Career in Climate Action", which was delivered virtually to UN staff members across the world.

The expansion of the BEI's activity necessitated further staff support and, in July 2023, we were delighted to welcome MIPP graduate Larissa Prata Varella to the BSIA staff team to help support the BEI's efforts.

The GAC Fellowship program continued to impact positively on the BSIA student experience. Thanks to the support of mentors from the School's faculty, Fellows and PhD program, the GAC Fellowship presentations and written policy briefs received excellent feedback from both our sponsors and the presiding course directors. The publication of the previous year's anthology, entitled "Rules vs Rivalry: 2023 Global Trends Report", served as another tangible achievement for all graduate students who contributed to it. The School continues to place great value on the opportunity our students have to publish in a policy-relevant edited volume.

The BSIA management team continues to provide critical strategic level capacity to the School and important links to our collaborative partners. We were delighted to welcome Dr. Debora VanNijnatten as the Laurier Associate Director of the management team, who joined Dr. Neil Craik from UW. We remain grateful to all members of the BSIA Council, and the Council's student representatives, for their ongoing commitment to our monthly Council meetings and the good ideas and questions they raise. Lastly, the research cluster leads and the PhD support officers continue to do an outstanding job of hosting timely, relevant and inclusive discussions and events.

Throughout the year our faculty, students and Fellows were active in the media and in producing policy-impactful research, which you will see later in this report. The ongoing recognition of BSIA faculty members through promotions and appointments reflects the strength of our community. Numerous faculty members and students were also successful in securing prestigious research grants and awards.

As we continue navigating a world of complex geopolitical terrain and increasingly challenging economic times, I want to acknowledge the hard work of the entire BSIA community in making

this another outstanding year for the School. I look forward to moving forward together into next year and, through our reputable taught courses, research programs, and strong community spirit, continuing to look for solutions to humanity's critical challenges.
